Hey, Platypus, Wabbit? Have you seen this whizgimmy?

Is she turning clockwise or widdershins?

Don't be silly. It's a sequence of still animated frames.

She's not turning.

...okay, I'm going to stare at you both now.

And then I'm going to eat some of this Concord grape pie.

Okay, okay, pulling your leg.

I can see the frames if I turn It on, but I know I'm slamming when I do it.

See the frames, or see it *as* frames? Because *I* can see the frames....

See it *as* frames. Kind of like strobe photography?

...

I can get her to switch, by staring at the corner where the shadow of her foot is, but she's going

anticlockwise unless I do it, and it's hard and disorienting for a second after I do it.

You see both at once?

Um. Yeah. Or the possibility of both, might be a better way to put it.

I can get the thing with the inside out cubes to hover in the middle too.

Stop giving me that "I can't wait to autopsy your brain!" look that Frost gives me, please.

Nobody's autopsying your brain while you're still using it, and anybody who wants to keep you from being in a position to use it is gonna hafta come through me.

Don't mess with the harpy.

Thank you
